No. 3 Dome Arm

To use inside of domes, so that chaling dishes, ventilators, etc., may be attached. O. B. B. K.  
List each \$1.02 1/2

NOTE: The No. D. C. 1 Metal Crown is to be used on any dome without a glass crown, measuring 6 1/2 inches at throat, on either straight gas or combination stems. This method makes it possible for shades with a 6 1/2-inch opening to also be used as an electric dome by using the No. 384 fixture, shown on preceding page, and leaving off the metal crown. The screws on both the metal crown and 384 cluster box (No. E. D. S. 3) fit into the lugs of a small inside ring furnished with dome. No charge.

**S**END your prospective customers to us, and let us sell them from the samples on the floor. You get regular profit on the sale, without any labor other than writing out an order, to furnish bearer what they select and charge to your account.

## IMPORTANT

**I**N offering you the lamps shown on the preceding pages we ask you to carefully notice the facility with which certain gas lamps may be converted into electric, and gas domes into electric or combination. This enables you to offer your customer any shade [except No. 2998] shown on pages 403 to 406 inclusive as a gas lamp or dome, or electric lamp or dome, providing, of course, you carry the necessary fittings shown on pages 414-416. In a word, instead of having only *one* chance to sell a shade, you have *four*.

In addition to our line of smaller staple lamps, we show a line of medium-priced lamps, selected most carefully, for their beauty and harmony of color effect and their graceful lines. Which do you prefer: the old-fashioned line of "one chance" shades, or our up-to-date line giving you such great possibilities?

We carry a few other Lamps and Domes, other than those shown in this catalog, of equally attractive design, also a line of semi-indirect lighting fixtures, a new field for gas lighting, and as beautiful as efficient.
